Distance between two points   P46254_en

Using the definition

> **struct** *Point* {
>   **double** x, y;
> };

write a function

> **double** *dist*(**const** *Point*& a, **const** *Point*& b);

that returns the euclidean distance between two points a and b.

Observation

You only need to submit the required classes; your main program will be ignored. Strictly obey the type definitions of the statement.
